*Aesthetics Division*  
**Laser Vein Treatment**  
**Patient Consent**

I understand that the removal or lightening of dilated superficial veins is a procedure that involves using a laser. Some discomfort may be experienced during laser treatment. I understand that there is a possibility of rare side effects such as scarring or permanent discoloration. Other side effects such as swelling, blistering, crusting, or flaking of the treated area, may require one to three weeks to heal. Once any of these conditions have healed, the treated area, may still be sensitive to the sun for an additional two to four weeks, or possibly longer in some patients. During the healing process, there is a slight possibility that the treated area can become either lighter or darker in color compared to the surrounding skin. This is usually a temporary condition; however, on a rare occasion it can be permanent. It is IMPORTANT that you follow all post-treatment instructions carefully.

I understand that if I've had sun exposure or used a tanning bed within a 3-day period pre or post treatment, I risk a possible pigment change or blistering.

I understand that this procedure involves a laser to coagulate the vessels and a bruising effect could last up to 6 months. It is possible the results will be minimal or not help at all. I realize that each individual's treatment response is different; therefore, it could require multiple treatments to achieve desired results.

Dr. Hornberger or an employee of Dr. Hornberger has explained the nature and purpose of the laser vein removal treatment, including any risks and possible complications, and has discussed the contents of this form with me. I have read and understand this consent form and I agree to its terms and authorize treatment. I further understand that Dr. Hornberger cannot guarantee the results and I will not hold Dr. Hornberger or her employees responsible for my individual results of the vein removal treatment that I have requested.
