

## **Medications and Prescription Refills**

Prescription refills are preferably done at the time of your doctors visit. If you take more than one or two medications, it is a good idea to bring all of your medications in a bag with each visit. That way we can verify that your medications are being taken correctly. We will accept phone calls for refills in some instances but only during the times the office is open. Please remember if you call after business hours, weekends or holidays, it could delay our response time. We check our messages throughout the day, in between checking in patients. Some medications require an appointment before refills can be written. It is important that you plan ahead so no delays occur in taking your regularly scheduled medication. Drop your refill by the pharmacy at least 24 hours in advance. Please note: for any phone calls for medication refill after 3 pm on weekdays, allow up to 48 hours for refill. Refills called in after 3 pm Friday may not be refilled until Tuesday.

## **After Hours Prescriptions-Plan Ahead**

After hours, on holidays and weekends, your pharmacist is able, by state law, to fill your prescriptions in up to 3 day amounts (this is for standing prescriptions you've been filling for awhile). They will then call us the next business day for the refill verification. Please only do this as a last alternative. **REMEMBER**, don't get in a fix, **PLAN AHEAD!**
